Education

Florida International University (FIU) **Miami, FL**

Bachelor of Science in Computer Science — GPA: 3.92/4.00 Expected Graduation, Dec 2027

- **Relevant Coursework**: Deep Learning, Machine Learning, Data Structures, Algorithm Techniques, Database Management, Net-Centric Computing, Operating Systems, Systems Programming, Computer Architecture

Work Experience

Applied Research Center - FIU **Mar 2026 – Present**

Undergraduate Research Assistant Miami, FL

- Accelerated research article creation time from **5 days** to **10 minutes** by architecting an AI summarization tool for an internal knowledge management platform using a vLLM pipeline, ASP.NET Web Forms, and Visual Basic.
- Automated frontend page field mapping and decreased production failures by **15%** through the deployment of a containerized FastAPI microservice on a Linux VM that parses AI-generated Markdown into structured JSON.

State Farm **May 2026 – Aug 2026**

Software Engineer Intern Bloomington, IL

- Synchronized AI chat history across Copilot and Claude Code, improving retrieval precision by **25%** at **sub-500ms** latency, by engineering a Python CLI and two-stage RAG pipeline (AWS Bedrock, OpenSearch).
- Secured infrastructure for **96M+** policies with zero downtime ahead of a critical deadline by orchestrating enterprise CA certificate migrations using Terraform, AWS Lambda (JavaScript), and CloudWatch.
- Launched a Kentucky-specific auto insurance feature supporting **730,000+** active policies using Angular and TypeScript, enforcing state-level business rules.

State Farm **May 2025 – Aug 2025**

Software Engineer Intern Bloomington, IL

- Automated **80%** of UI testing workflows for **10+** developers by developing a multi-agent application (OpenAI Agents SDK, RAG, Vector Database), cutting manual QA time by **30** minutes per test cycle.
- Reduced deployment delays by **10** minutes across services supporting **2M+** policyholders by parallelizing automated test execution across multiple policy lines in GitLab CI/CD pipelines.
- Mitigated service outages for **1M+** active policies by implementing automated fallback strategies for AWS Lambda-backed REST APIs, securing endpoints with IAM and monitoring health via CloudWatch.

Projects

C++ AI Inference Engine | Infrastructure | C++, GGML, Pybind11, FastAPI, ReactJS **Aug 2026 – Present**

- Architecting a memory-efficient AI inference engine to serve and stream local models, by engineering an optimized C++ backend and binding it to a real-time streaming pipeline (SSE) for web applications.

Football AI Detection | Notebooks | Python, YOLOv26, SigLIP, UMAP, K-Means **Feb 2026 – May 2026**

- Generated 2D tactical maps and match analytics from raw football footage, by engineering a computer vision pipeline that extracts and clusters **22+** entity embeddings per frame via homography projection.

VPay | Web Application | ReactJS, TailwindCSS, Python, FastAPI, Google ADK **Sep 2025 – Nov 2025**

- Built a wallet-less payment application utilizing a multi-agent voice embedding pipeline, achieving **80%+** reliability and cutting authentication errors by **30%** across **100+** transactions.

Leadership

INIT FIU **Dec 2025 – Present**

AI/ML Technical Lead Miami, FL

- Facilitated hands-on machine learning training for **190+** students across **10** workshops by designing interactive AI curriculum and accessible lab environments using **Google Colab** and **Notion**.

Technical Skills

Languages: Python, Java, JavaScript/TypeScript, SQL, HTML/CSS
Frameworks & Libraries: PyTorch, Scikit-learn, vLLM, React, Angular, FastAPI, Node.js, Express.js, Google ADK
Developer Tools: AWS (Lambda, Bedrock, IAM, CloudWatch), Terraform, OpenTofu, Docker, CI/CD, Git, Linux
