Education

Florida International University (FIU)

Miami, FL

Bachelor of Science in Computer Science — GPA: 3.92/4.00

Expected Graduation, Dec 2027

- **Relevant Coursework:** Deep Learning, Machine Learning, Data Structures, Algorithm Techniques, Database Management, Net-Centric Computing, Operating Systems, Systems Programming, Computer Architecture

Work Experience

Applied Research Center - FIU

Mar 2026 – Present

Undergraduate Research Assistant

Miami, FL

- Architected a vLLM-powered summarization pipeline for the D&D KM Technology Module using ASP.NET Web Forms, Visual Basic, and internal APIs, reducing Technology article creation time from **5 days to 10 minutes**.
- Developed and deployed a FastAPI endpoint using vLLM to convert Markdown summaries into structured JSON via Docker on a Linux VM, automating field mapping to page sections and reducing production failures by **15%**.
- Contributed to the development and maintenance of full-stack research applications (*D&D KM*, *FAICE*), supporting knowledge management and operational workflows for a department of **40+** researchers.

State Farm

May 2026 – Aug 2026

Software Engineer Intern

Bloomington, IL

- Engineered an AI-powered CLI (Python, AWS Bedrock, OpenSearch) to unify GitHub Copilot and Claude Code context; built a two-stage RAG pipeline improving retrieval precision by **25%** with **<500ms** latency.
- Migrated enterprise CA certificates via Terraform and AWS Lambda (JavaScript), leveraging CloudWatch to ensure zero downtime for infrastructure supporting **96,000,000+** policies ahead of a critical security deadline.
- Developed a Kentucky-specific auto insurance coverage feature using Angular and TypeScript, enabling policy management for **730,000+** active auto policies by implementing state-specific business rules.

State Farm

May 2025 – Aug 2025

Software Engineer Intern

Bloomington, IL

- Led initial development of a multi-agent app (OpenAI Agents SDK, RAG, Vector Database) to automate **80%** of UI testing, reducing manual QA time by **30 minutes** and scaling workflows for **10+ developers**.
- Optimized GitLab CI/CD pipelines by parallelizing automated tests across Auto, Fire, Boat, and other coverage policies, reducing deployment delays by **10 minutes** for services supporting **2,000,000+ policyholders**.
- Enhanced RESTful APIs on AWS Lambda with a fallback strategy, mitigating outages affecting **1,000,000+ policies**; refactored **30+** unit tests; leveraged IAM, CloudFront, and CloudWatch for security and availability.

Projects

Football AI Detection | [Notebooks](#) | Python, YOLOv26, SigLIP, UMAP, K-Means

Feb 2026 – May 2026

- Engineered a computer vision pipeline to extract **22+** entity embeddings per frame; applied clustering and homography projection to generate 2D tactical maps and match analytics.

VPay | Web Application | ReactJS, TailwindCSS, Python, FastAPI, Google ADK

Sep 2025 – Nov 2025

- Built a wallet-less payment app utilizing voice-to-vector embeddings for biometric authentication; achieved **80%+** reliability and cut authentication errors by **30%** across **100+** transactions.

Leadership

INIT FIU

Jun 2024 – Present

AI/ML Technical Lead & Machine Learning Lead

Miami, FL

- Developed **advanced AI** workshop materials using **Google Colab** and **Notion**, enabling hands-on machine learning labs for **100+** student participants across **6** workshops, improving accessibility of technical AI concepts.

Technical Skills

Languages: Python, Java, JavaScript, TypeScript, SQL, HTML/CSS

Frameworks: React, Angular, FastAPI, Node.js, Express.js

AI/ML: PyTorch, Scikit-learn, OpenAI Agents SDK, Google ADK, RAG, Vector Databases, vLLM

Cloud: AWS Lambda, Bedrock, IAM, CloudWatch, Terraform, OpenTofu

Developer Tools: Git, GitHub, GitLab, Claude Code, Codex, GitHub Copilot, Docker, CI/CD, Google Colab, Linux
